

Agency Banking System

An innovative and secure OmniChannel solution converging all digital channels, cooperating with any Core Banking System, offering unique user experience and personalized customer services

Two-way beneficial relationship:

Customers have a **consistent experience** whether accessing the bank via a mobile, a tablet, web or by visiting a branch in person.

The bank is able to **analyze** the information being fed in from different channels so that it can build up a detailed and **accurate picture** of the customer's preferences and behaviour. Likewise it can offer **personalized** services.

Highlights
